Let's Go Fishing

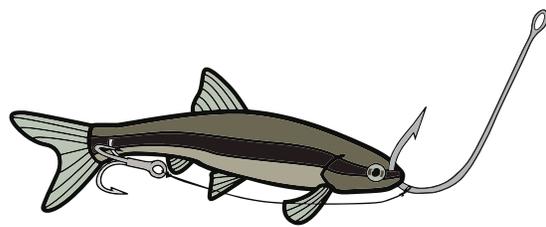

## HOW TO HOOK A MINNOW

Watch the video at [youtube.com/tackleshare](https://youtube.com/tackleshare) or click 

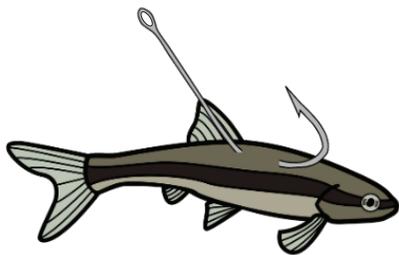

### THROUGH THE TAIL

Hook the minnow through the tail above the spine to avoid injuring the minnow.

### THROUGH THE MOUTH

Hook the minnow just through the mouth, making sure not to injure the head.

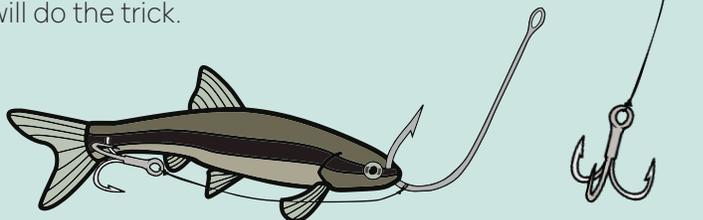

### THROUGH THE BACK

Hook the minnow through its back above the lateral line to avoid damaging the spine or vital organs.

### TACKLESHARE TIP: ADD A "STINGER HOOK"

This secondary hook trails behind your primary hook on a short piece of line. Typically a treble hook with one point pierced into the minnow, it can be used with any of these hooking methods. If a fish strikes and misses your primary hook, often the stinger hook will do the trick.
